New Netherland: An Exploration of Past and Present An Interdisciplinary Curriculum for the 4th Grade

A teacher- and student- friendly interdisciplinary curriculum for the 4th grade. **Developed to follow New York State Curriculum Standards**, this publication consists of seven lessons and a standard Document-Based Question (DBQ). The lesson plans use primary documents, raw data from the operation of the replica Half Moon, and well-designed exercises, and may be used in their entirety or as stand-alone lessons. Subjects covered include History, Geography, Mathematics, Science, Language Arts, and Reading. The DBQ may be used as a learning instrument or as a practice test for the New York State 5th grade Social Studies standardized test.

New Netherland: An Exploration of a Dutch Colonial Settlement An Interdisciplinary Curriculum for the 7th Grade

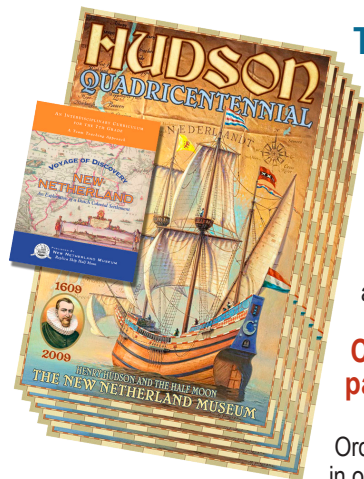

This curriculum is an interdisciplinary, team-teaching curricular guide. It contains seven lessons, with arts, language, science and social-science content, that focus on the Dutch colonial experience in New York. These lessons are aligned with **New York State educational standards developed for the seventh grade**. The guide is designed to be completed in a coordinated fashion, utilizing team teaching methodologies, and culminates with the administration of a Document-Based Question (DBQ) pertaining to developmental characteristics of the Dutch colony of New Netherland.
